

Recession Proof Your Energy Budget

As we enter a time of rapid inflation, we recognize that you're scrutinizing every line item in your budget - and in many buildings energy represents 19% of expenditures. Add to that the recent price volatility in the energy markets and you could get hit with a devastatingly high energy bill (remember the polar vortex and Texas power crisis). **Now is the time to ask yourself - is my energy budget ready for the turbulent years ahead?**

Yes	No	Does your energy broker or consultant do the following?
<input type="checkbox"/>	<input type="checkbox"/>	<p>Not lock you into a set price for the next 2-5 years We've seen property managers get locked into 60-month contracts at very high rates. That makes your broker or supplier's job easier, but you'll be paying the price</p>
<input type="checkbox"/>	<input type="checkbox"/>	<p>Share regular updates about layered hedging strategies you're eligible for You should always be informed about your current energy purchasing options - otherwise, you may be letting your broker guide you into a poor decision</p>
<input type="checkbox"/>	<input type="checkbox"/>	<p>Give you the ability to benefit from price dips during the term of your contract Your broker should be monitoring the energy markets daily and informing you up to 4 times a year about discounted buying opportunities 1-4 years out</p>
<input type="checkbox"/>	<input type="checkbox"/>	<p>Provide you with detailed analysis of energy-efficiency projects Whether you are considering LED lighting, new heating and cooling systems, insulation or renewable energy alternatives, you deserve to understand the likely return on your investment</p>
<input type="checkbox"/>	<input type="checkbox"/>	<p>Deliver an all-inclusive budget If your broker is only sharing your energy budget, you don't have a full picture of your costs. A good consulting firm will include your forecasted expenses across energy, non-energy, utilities, state and local taxes</p>

**If you could not answer yes to all of the above then you are paying too much for energy
