

What if you could offer a friend or colleague the opportunity to save 16% on their energy costs? That's the sort of savings our clients achieve on average as compared to strategies employed by other energy brokers and consultants. In fact, over the past several years **Prospect Resources (PRI) has saved clients over \$50M through energy hedging while reducing their price volatility by 60%.**

So, give a network contact the advantage of energy savings and stable prices. When you introduce PRI to a friend or family member and they become a paying client, we will send you a Visa gift card for \$100-\$500 based on the size of the account. It's a small token of our appreciation for your referral.

### **Ready to make an introduction?**

1. [Email](#) an introduction to your friend and copy Azi.
2. We'll talk to your friend and see if we can help.
3. We'll keep you informed on whether your friend became a client and send you a Visa gift card for \$100-\$500 if they do.

We look forward to your introduction.

Warmly,

Azi Feifel and the team at Prospect Resources
